

DID YOU KNOW

THAT SAS CO₂ OFFSETS

ALL EUROBONUS

MEMBERS TRIPS AND

YOUTH TICKETS ON

SAS FLIGHTS?

We also offset for all staff tickets and our own business trips. If you don't wish to become a EuroBonus member, you can choose to offset at own expense through the calculator found here: <https://www.sas.se/en/fly-with-us/travel-extras/co2-offsets/>

Make sure to tell your friends and family about the EuroBonus and Youth CO₂ offsetting – and if you'd like, share it on your social media!

SAS CARBON OFFSETTING

SAS invests in offsetting mechanisms in renewable energy projects based on wind power. It is a small but important action to decrease our environmental impact, step by step.

HOW DOES IT WORK?

The offsetting means that the equivalent amount of CO₂ emitted is compensated through improvements in other sectors. The CO₂ offsetting is made possible through a third party named The Natural Capital Partners, which SAS has worked with since 2005. Based on audits and supplier screenings they fulfill our requirements. The amount that SAS offsets is calculated based on travel statistics and emission data.

WHAT DOES THE OFFSETTING CONTRIBUTE TO?

The offsetting is conducted with offsetting mechanisms connected to investments in renewable energy projects, specifically in wind power as it is perceived as a trustworthy compensation method. SAS supplier, The Natural Capital Partners, handles investments in these projects. The offsetting does not decrease emissions in SAS production, but compensates for them by reducing emissions in other sectors.
